

Communication

Date	2 July, 2026
Team ID	
Project Name	Hydra Shield: An Intelligent Flood Prediction and Early Warning System (Rising Waters)
Maximum Marks	1 Mark

Communication Plan:

Effective communication was maintained throughout the development of the HydraShield project to ensure smooth collaboration among team members, timely completion of project milestones, and successful implementation of the intelligent flood prediction system.

S.No	Communication Type	Frequency	Channel / Tool		Participants	Purpose
1	Team Standup	Daily	Google Meet / WhatsApp		Project Team Members	Discuss daily tasks, assign responsibilities, and review progress.
2	Progress Update	Weekly	Google Meet / Microsoft Teams		Team Members & Project Guide	Present weekly achievements and receive guidance.
3	Issue / Bug Discussion	As Needed	WhatsApp / VS Code Live Share		Development Team	Resolve coding issues, model errors, and debugging tasks.
4	Stakeholder Review	Bi-Weekly	Google Meet		Project Guide & Team Members	Review project milestones and collect improvement suggestions.
5	Final Demo Rehearsal	Once	Classroom / Google Meet		Entire Project Team	Practice the complete project demonstration before evaluation.

6	Documentation Review	Weekly	Google Docs / Microsoft Word		Team Members	Verify project documentation and ensure completeness

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty integrating the trained ML model with the Flask application.	Verified model serialization, corrected file paths, and tested the integration repeatedly.
2	Inconsistent dataset values and missing records affected prediction accuracy.	Performed data preprocessing, handled missing values, encoded categorical features, and normalized data.
3	Coordination of project tasks and meeting schedules among team members.	Established a regular meeting schedule and used WhatsApp and Google Meet for continuous communication and updates.
